

February 27, 2012

To Whom it May Concern:

I have known Garrett Reed for the past year through his enrollment in my Digital Media class at the Mt. Pleasant Area Technical Center (MPATC). As his instructor, I have observed and witnessed Garrett's many talents in the production of digital design projects. I have had the opportunity to observe Garrett's effective and talented artistic skills. He possesses tremendous design skills along with a positive and friendly personality.

Garrett has several strengths but his main strength, in my opinion, is his ability to be self-driven. He possesses a high degree of enthusiasm and determination to bring his visions to life. He has the tremendous capacity to complete tasks with great initiative and detail. He has always fulfilled his responsibilities with professionalism, timeliness, and thoroughness.

In my observation, Garrett is a positive, dependable, and a driven individual. I believe that Garrett emulates the characteristics of a model student and citizen. He possesses effective communication and technical design skills.

Sincerely,
